TRADING & REFINING

PROPERTY

AGRITECH

The Division returned a significantly lower profit due mainly to the sharp fall in palm product prices arising from the recovery in crop production after experiencing a supply tightness caused by the prolonged El Nino induced drought in most areas of the region during the previous year. Expectation of a good soya bean harvest also weighed on prices.

Plantations

Fresh Fruit Bunches (FFB) production increased to 1,341,753 tonnes. The increase in crop came from newly matured areas and the improvement in the FFB yield to 20.5 tonnes per hectare. Intake of FFB from outside suppliers was reduced by 24% to 292,232 tonnes. After excluding FFB sold unprocessed, total FFB processed declined by 5.2% to 1,565,275 tonnes. Accordingly, crude palm oil production decreased by 5.1% to 295,435 tonnes. The average oil extraction rate was 18.9% against 18.8% last year.

Rubber production was lower than the previous year due mainly to the conversion of old rubber areas to oil palm.

Due to the economic crisis in Indonesia, development of the Sanggau oil palm plantation in West Kalimantan was focused on 9,600 hectares. Crop production from the initial 2,000 hectares planted in 1997 has been below expectation due to staggered and uneven planting.

Commodity Trading & Refining

Profits from commodity trading and marketing services declined due to the lower palm product prices.

Penyusutan ketara harga barangan sawit berikutan pemulihan pengeluaran tanaman selepas mengalami kesukaran bekalan akibat kemarau berpanjangan gejala El Nino yang melanda kebanyakan kawasan di rantau ini pada tahun sebelumnya adalah penyumbang utama yang menyebabkan Bahagian ini mencatatkan keuntungan yang ketara berkurangan. Jangkaan penuaian kacang soya yang memuaskan turut memberi kesan kepada harganya.

Perladangan

Pengeluaran Buah Tandan Basah (BTB) meningkat kepada 1,341,753 tan. Pertambahan hasil ini terbit daripada beberapa kawasan matang baru dan peningkatan hasil BTB kepada 20.5 tan sehektar. Pengambilan BTB dari para pembekal luar berkurangan sebanyak 24% kepada 292,232 tan. Selepas mengecualikan BTB yang dijual tanpa proses, jumlah BTB diproses susut sebanyak 5.2% kepada 1,565,275 tan. Oleh itu, pengeluaran minyak sawit mentah juga susut sebanyak 5.1% kepada 295,435 tan. Kadar perahan minyak purata berjumlah 18.9% berbanding 18.8% pada tahun lepas.

Penukaran kawasan getah tua kepada kelapa sawit menyebabkan pengeluaran getah berkurangan berbanding pada tahun sebelumnya.

Krisis ekonomi di Indonesia menyebabkan pembangunan ladang kelapa sawit Sanggau di Kalimantan Barat tertumpu di kawasan seluas 9,600 hektar sahaja. Pengeluaran hasil dari kawasan permulaan seluas 2,000 hektar yang ditanam pada tahun 1997 adalah di bawah jangkaan akibat penanaman yang dibuat secara berperingkat dan tidak seimbang.

Perdagangan Komoditi & Penapisan

Keuntungan dari perdagangan komoditi dan perkhidmatan pemasaran susut akibat penyusutan harga barangan sawit.

Rubber/Getah	2,679	4,502

The various refining businesses, with the exception of the refinery in Thailand, reported higher profits. Savola Sime Foods Limited continued to be the major contributor to profits. The refinery in Thailand has been adversely affected by the deterioration in the selling prices of palm products.

Property

Sales demand for exclusive homesteads at Planters' Haven remained weak despite the improved economic situation and availability of financing to the property sector. There were encouraging sales of double-storey terrace and shop houses at Taman Kerian Permai, a mixed medium-cost residential and commercial development near Parit Buntar, Perak.

Wisma Consplant had a relatively good occupancy rate averaging 78%. Occupancy remained low in the recently refurbished Wisma Tractors.

The 22-storey 498-room Hotel Equatorial Melaka showed an improvement in occupancy rate to 43% but the average room rate declined, reflecting the oversupply of hotel rooms in Melaka and the slow recovery of the tourism market in the country.

Agritech

The aeroponic farm in Singapore has been increasing its production of assorted lettuces and sub-tropical leafy vegetables to cater for higher monthly sales averaging between 20 and 25 tonnes. This improvement can be attributed to aggressive marketing in the retail and food services sector, and the introduction of higher margin products, including salad bowls and the "Lettucino" vegetable juice.

The two-acre aeroponic farm and related research facilities near Seremban, with an annual production capacity of more than 300 tonnes of temperate and sub-tropical vegetables, commenced commercial production at the beginning of the year. Marketed under the "Sime Fresh" brand name, the vegetables are now available at major retail outlets. Sales and brand awareness have been on the rise, with monthly sales volume increasing to 10 - 14 tonnes.

Beberapa perniagaan penapisan, kecuali penapisan di Thailand, melaporkan pertambahan keuntungan. Savola Sime Foods Limited terus menjadi penyumbang utama keuntungan. Penapisan di Thailand terjejas akibat kejatuhan harga jualan barangan sawit.

Hartanah

Jualan homestead eksklusif di Planters' Haven kekal lemah walaupun keadaan ekonomi bertambah baik dan pembiayaan tersedia kepada sektor hartanah. Jualan rumah teres dua tingkat dan rumah kedai di Taman Kerian Permai, sebuah pembangunan campuran kediaman dan perdagangan kos sederhana berhampiran Parit Buntar, Perak, adalah menggalakkan.

Wisma Consplant mempunyai kadar penghunian secara relatif yang baik, dengan purata sebanyak 78%. Penghunian kekal rendah di Wisma Tractors yang baru diubahsuai.

Kadar penghunian Hotel Equatorial Melaka 22 tingkat dengan 498 bilik meningkat kepada 43%, tetapi kadar bilik purata susut, menggambarkan lebih bekalan bilik hotel di Melaka dan kelembapan pemulihan industri pelancongan di negara ini.

Teknologi Pertanian

Ladang aeroponik di Singapura telah menambah pengeluaran berbagai jenis salad dan sayur-sayuran berdaun separuh tropika untuk memenuhi pertambahan jualan bulanan yang secara purata berjumlah antara 20 hingga 25 tan. Prestasi yang bertambah baik ini adalah disebabkan oleh pemasaran agresif di peringkat runcit dan sektor perkhidmatan makanan serta pengenalan barangan bermargin tinggi termasuk mangkuk salad dan jus sayur "Lettucino".

Ladang aeroponik sayur-sayuran hawa sederhana dan separuh tropika seluas dua ekar dengan kemudahan penyelidikan berkaitan dekat Seremban, yang berkapasiti tahunan lebih 300 tan memulakan pengeluaran secara komersial pada awal tahun. Kini, sayur-sayuran yang dipasar di bawah jenama "Sime Fresh" ini boleh didapati di beberapa saluran runcit utama. Jualan dan kesedaran jenamanya semakin meningkat dengan volum jualan bulanan meningkat kepada 10 - 14 tan.

The Tyre Manufacturing Division reported satisfactory levels of turnover and profitability. All segments of the business experienced better demand in line with the economic recovery in Malaysia. Profits fell in the second half of the year after the increases in raw material prices following the rise in oil prices. With the changes to the import tariff for tyres following the Malaysian Government's commitment to the World Trade Organization (WTO) and AFTA, selling prices in the domestic market have come under increasing pressure due to the influx of imported tyres. The Division has adopted a strategy to penetrate the ASEAN market more aggressively to increase its products' market share in countries such as Thailand, Indonesia and the Philippines. This will enable the Company to withstand any downturn in the future in the domestic market. The export team will continue to target new markets while enhancing distribution in the Middle East, Australia, New Zealand, the Indian continent, Europe and the African nations.

The Truck and Bus Radial (TBR) plant was officially launched during the year. Trial sales of the TBR tyres are being made in the domestic and export markets.

Earthmover tyres experienced higher demand as a result of the turnaround in the domestic logging sector fueled by the strong demand for timber from countries in East Asia. Successful inroads have also been made in the export market for industrial tyres for use in seaports and airports.

During the year, DMIB launched its range of agricultural flotation tyres, making it the only manufacturer of such tyres in the South East Asian region. The Company also launched the Jungle Trekker 2 and Extreme Trekker range for 4 Wheel Drive vehicles, and these have been well received in the market both locally and overseas.

The Aircraft Tyre Division performed well, having secured a major supply contract in the Middle East. The Division is focusing on the opportunities available for aircraft tyre sales in the Asia Pacific region, the fastest growing region for aircraft purchases in both the commercial and military markets. Many new products are under development and the Division is expected to contribute positively to the overall profitability of the Company.

*The first Truck and Bus Radial tyre commissioned and moulded at DMIB's TBR factory
Tayar Radial Trak dan Bas pertama yang ditauliah dan diacu di kilang TBR milik DMIB*

Bahagian Perkilangan Tayar melaporkan tahap perolehan dan keuntungan yang memuaskan. Semua segmen perniagaan menikmati permintaan yang bertambah baik selaras dengan pemulihan ekonomi di Malaysia. Keuntungan susut pada setengah tahun kedua berikutan kenaikan harga bahan mentah dan akibat kenaikan harga minyak. Perubahan tarif import bagi tayar berikutan komitmen Kerajaan Malaysia terhadap Pertubuhan Perdagangan Dunia (WTO) dan AFTA menyebabkan harga jualan di pasaran domestik semakin tertekan akibat kebanjiran tayar import. Bahagian ini telah mengamalkan strategi untuk menembusi pasaran ASEAN dengan lebih agresif untuk menambah bahagian pasarnya di negara-negara seperti Thailand, Indonesia dan Filipina. Ini akan membolehkan Syarikat bertahan dalam sebarang kemelesetan di pasaran domestik pada masa depan. Pasukan eksport akan terus menyasar beberapa pasaran baru sambil mempertingkatkan pengedaran di negara-negara Timur Tengah, Australia, New Zealand, benua India, Eropah dan Afrika.

Loji Trak dan Radial Bas (TBR) dilancarkan secara rasmi pada tahun ini. Jualan percubaan tayar TBR sudah dimulakan di pasaran domestik dan eksport.

Tayar jentolak mencatatkan pertambahan permintaan hasil pemulihan sektor pembalakan domestik yang didorong oleh keteguhan permintaan untuk kayu dari negara-negara di Asia Timur. Tayar perindustrian untuk kegunaan di pelabuhan dan lapangan terbang juga berjaya menembusi beberapa pasaran eksport.

Pada tahun ini, Syarikat melancarkan berbagai jenis tayar apungan pertanian, menjadikan DMIB satu-satunya pengilang tayar sedemikian di rantau Asia Tenggara. Syarikat juga telah melancarkan tayar jenis Jungle Trekker 2 dan Extreme Trekker untuk kenderaan Pacuan 4 Roda dan ia mendapat sambutan baik daripada pasaran tempatan dan antarabangsa.

Bahagian Tayar Kapal Terbang mencatatkan prestasi memuaskan setelah memperolehi kontrak bekalan utama di Timur Tengah. Bahagian ini memfokus peluang yang tersedia untuk menjual tayar kapal terbang di rantau Asia Pasifik, rantau paling pesat berkembang untuk pembelian kapal terbang bagi pasaran perdagangan dan tentera. Banyak produk baru sedang dibangunkan dan Bahagian ini dijangka akan memberi sumbangan positif kepada tahap keuntungan keseluruhan Syarikat.

The Golf Division increased sales for the year. The Malaysian-made Thommo range of balls is now widely distributed in all continents, having received favourable worldwide exposure as a result of being chosen as the official ball for the World Cup Golf tournament held in New Zealand in 1998 and at The Mines Resort City Malaysia in 1999.

As a manufacturer of golfballs, the Division added another feather to its cap when it won the Industry Excellence Award 1999 given by the Ministry of International Trade and Industry (MITI) for the Thommo Titanium Pro-Feel Golfball.

Demand for bedding and furniture products improved during the year. Competition in the domestic market remained intense, resulting in lower margins. However, export sales were very encouraging, particularly to Japan. The Company's strategy is to increase export sales to countries like Japan, Korea, Singapore and Australia.

Turnover of the Chemical Division increased following the improvement in the domestic automotive market to which the Division remained a major supplier for sealants.

Simex Chemical Sdn Bhd signed a Technical Aid Agreement with EFTEC Asia Pte Ltd of Singapore for the manufacture and sales of PVC Plastisol and sealant and wax anti-corrosion products for the automotive industry.

The Chemical Division scored another success when it received the acclaimed MS:ISO 9001:1994 Management Quality System from SIRIM QAS Sdn Bhd, as a result of the Division proving its research design and development capability.

Sales of solid and pneumatic tyres and other associated rubber products by the Industrial and Rubber Products Division (IRP) increased tremendously during the year. The Division, which expanded its existing range and widened its dealer network nationwide, is poised to take advantage of the increased demand for solid tyres and batteries following the economic recovery in ASEAN.

Sime Darby Technology Centre (SDTC) continued to provide research and development support to the Group's operations. During the year, SDTC's Aircraft Tyre Testing Laboratory received provisional organisational approval by the Department of Civil Aviation (DCA) to carry out qualification tests on aircraft tyres. All new and retreaded aircraft tyres intended for use in civil and military aircraft must be subjected to and pass regulatory requirements, as well as be approved by the relevant aviation authorities. Such requirements include the qualification test, a minimum performance standard test prescribed by the US Federal Aviation Administration.

SDTC's tyre testing facilities were also approved by the Vehicle Certification Agency (VCA), UK, to test tyres according to the regulations set down by the Economic Commission for Europe. In the past, tyres had to be sent to UK for such testing. SDTC is the only tyre testing facility in the region to have received the VCA certification.

Jualan Bahagian Golf meningkat pada tahun ini. Bola golf jenis Thommo buatan Malaysia kini diedarkan secara meluas di semua benua, setelah mendapat pendedahan menggalakkan di seluruh dunia kerana terpilih sebagai bola rasmi bagi kejohanan Golf Piala Dunia yang berlangsung di New Zealand pada tahun 1998 dan di The Mines Resort City Malaysia pada tahun 1999.

Sebagai pengilang bola golf, Bahagian ini telah menambah satu lagi kecemerlangan apabila ia meraih Anugerah Kecemerlangan Industri 1999 yang diberi oleh Kementerian Perdagangan Antarabangsa dan Industri (MITI) bagi Bola Golf Thommo Titanium Pro-Feel.

Permintaan bagi barangan peralatan tempat tidur dan perabot bertambah baik pada tahun ini. Persaingan di pasaran domestik kekal hebat menyebabkan margin dicapai rendah. Walau bagaimanapun, jualan eksport terutamanya ke Jepun, amat menggalakkan. Syarikat telah mengatur strategi untuk meningkatkan jualan eksport ke negara-negara seperti Jepun, Korea, Singapura dan Australia.

Perolehan bagi Bahagian Kimia meningkat berikutan pemulihan pasaran automotif domestik di mana Bahagian ini kekal sebagai pembekal utama penyedat.

Simex Chemical Sdn Bhd memeterai Perjanjian Bantuan Teknikal dengan EFTEC Asia Pte Ltd dari Singapura untuk pengilangan dan penjualan PVC Plastisol dan penyedat serta barangan anti karat untuk industri automotif.

Bahagian Kimia mencapai satu lagi kejayaan apabila ia menerima Sistem Kualiti Pengurusan MS:ISO 9001:1994 daripada SIRIM QAS Sdn Bhd, berikutan kemampuan Bahagian ini membuktikan keupayaan rekabentuk dan pembangunan penyelidikannya.

Jualan tayar padu dan pneumatik serta barangan getah berkaitan yang dikeluarkan oleh Bahagian Barangan Getah dan Industri (BBGI) meningkat dengan ketara pada tahun ini. Bahagian ini yang telah meluaskan jenis barangan dan rangkaian wakil penjualnya di seluruh negara dijangka akan mengambil kesempatan daripada pertambahan permintaan untuk tayar padu dan bateri berikutan pemulihan ekonomi ASEAN.

Sime Darby Technology Centre (SDTC) terus menyediakan perkhidmatan sokongan penyelidikan dan pembangunan kepada operasi Kumpulan. Pada tahun ini, Makmal Ujian Tayar Kapal Terbang SDTC mendapat kelulusan organisasi peruntukan daripada Jabatan Penerbangan Awam (JPA) untuk menjalankan ujian kelayakan ke atas tayar kapal terbang. Semua tayar kapal baru dan celup yang ingin digunakan pada kapal terbang awam dan tentera perlu tertakluk kepada dan lulus keperluan peraturan serta perlu diluluskan oleh pihak-pihak berkuasa penerbangan berkaitan. Keperluan sedemikian termasuk ujian kelayakan, ujian pita prestasi minimum yang ditetapkan oleh Pentadbiran Penerbangan Persekutuan Amerika Syarikat.

Kemudahan ujian tayar SDTC juga telah diluluskan oleh Vehicle Certification Agency (VCA), UK untuk menguji tayar mengikut peraturan yang ditetapkan oleh Suruhanjaya Ekonomi Eropah. Pada masa lepas, tayar terpaksa dihantar ke UK untuk menjalani ujian sedemikian. SDTC adalah satu-satunya kemudahan ujian tayar di rantau ini yang telah mendapat pengesahan VCA.

HEAVY EQUIPMENT

MOTOR
ASSEMBLY & DEALERSHIP

Heavy Equipment

The Division reported a healthy growth in sales for the year. The logging sector has been active with good round-log prices spurring demand for new, used and reconditioned machines. In the construction sector, activity began to pick up mainly in the second half of the year with infrastructure contractors fuelling most of the demand. Building contractors have been slower to recover due to oversupply in the property sector.

Parts and service sales grew by 30% assisted by a general pickup in machine activity throughout the country. The other heavy equipment business units all managed to equal or surpass last year's sales performance.

Local assembly of the Caterpillar 527 dozer commenced in the second half of the year. To date, 62 units have been assembled at the Tractors Manufacturing and Assembly plant in Johor Bahru. Of these units, 28 have been sold or committed for sale as at June 2000. This programme will help bring affordable specialised products into the country, particularly for the active logging sector.

The Heavy Equipment division also celebrated its 70th anniversary as a Caterpillar dealer in November 1999. We are confident that this successful and proven business relationship will continue long into the future for the mutual benefit of both parties.

Peralatan Berat

Bahagian ini melaporkan pertumbuhan jualan yang mantap pada tahun ini. Sektor pembalakan bergerak cergas kerana harga balak bulat yang menggalakkan telah mendorong pertambahan permintaan bagi jentera baru, terpakai dan ubahsuai. Aktiviti sektor pembinaan yang mula cergas terutamanya pada setengah tahun kedua tahun ini yang sebahagian besarnya didorong oleh permintaan dari para kontraktor infrastruktur. Lebihan bekalan di dalam sektor hartanah pula menyebabkan kontraktor bangunan melalui pemulihan yang agak perlahan.

Kenaikan menyeluruh aktiviti berkaitan jentera di seluruh negara melonjakkan jualan sektor alat ganti dan servis sebanyak 30%. Semua unit perniagaan peralatan berat lain berjaya menyamai atau memperbaiki prestasi tahun lepas.

Pemasangan tempatan bagi Caterpillar 527 dozer bermula pada setengah tahun kedua. Sehingga kini, sebanyak 62 unit telah dipasang di Loji Pengilangan dan Pemasangan Tractors di Johor Bahru. Daripada jumlah tersebut, 28 telah dijual atau mempunyai perjanjian jualan setakat bulan Jun 2000. Program ini akan membantu memperkenalkan produk khusus yang lebih mampu dimiliki ke negara ini terutamanya bagi sektor pembalakan yang sedang aktif.

Pada bulan November 1999, Bahagian Peralatan Berat telah meraikan sambutan ulang tahun ke 70 sebagai wakil penjual Caterpillar. Kami berkeyakinan bahawa kejayaan dan hubungan perniagaan yang terbukti berkesan ini akan terus berkekalan pada masa akan datang untuk kebaikan kedua-dua belah pihak.

Traktor Cat 527 - pembangunan bersama Caterpillar/Tractors Malaysia khusus untuk kesan yang rendah kepada alam sekitar di hutan tropika Malaysia

Tractors Malaysia's warehouse provides a complete range of parts for Caterpillar equipment
Gudang Tractors Malaysia menyediakan alat ganti yang lengkap untuk peralatan Caterpillar

Motor

The motor sector has been the prime beneficiary of the Malaysian economic recovery. Sales of motor vehicles were significantly higher than in the previous year due to an improvement in consumer and business sentiment, affordable financing and new model launches. The recently launched and locally assembled BMW 3-series, Range Rover Discovery-II and Ford Ranger 4x4 twin-cab, together with the imported Ford Focus car, have all been favourably received by the Malaysian motoring public.

In June, the wholly owned subsidiary Scandinavian Truck & Bus Sdn Bhd mutually agreed with the Scania Group to end the distributorship agreement in Malaysia.

In the same month, the Group warmly welcomed the increased participation in the import, local assembly and distribution of Ford branded motor vehicles in Malaysia by the Ford Motor Company of the USA. With Ford's 49% equity involvement in AMIM Holdings Sdn Bhd, the latter is now well positioned to take advantage of the pending market liberalisation in the region. It is envisaged that with Ford's increased involvement in domestic and regional opportunities, shareholder value in this operation will be enhanced in the near future.

During the year, Auto Bavaria, the distributor of BMW cars, secured the award of "Best Selling European Passenger Car in Malaysia".

Motor

Sektor motor meraih manfaat yang besar daripada pemulihan ekonomi Malaysia. Peningkatan dalam sentimen pengguna dan perniagaan, pembiayaan yang mampu diperolehi dan pelancaran berbagai model baru telah mendorong pertumbuhan ketara jualan motor. BMW 3-series, Range Rover Discovery-II dan Ford Ranger 4x4 twin-cab yang dipasang di dalam negara dan baru dilancar, bersama-sama dengan kereta Ford Focus yang diimport telah mendapat sambutan hangat daripada para pengguna di Malaysia.

Pada bulan Jun, syarikat subsidiari milik penuh, Scandinavian Truck & Bus Sdn Bhd telah mencapai persetujuan dengan Scania Group untuk menamatkan perjanjian pengedaran di Malaysia.

Pada bulan yang sama, Kumpulan mengalu-alukan penyertaan tambahan Ford Motor Company dari Amerika Syarikat dalam aktiviti pengimportan, pemasangan tempatan dan pengedaran kenderaan bermotor jenama Ford di Malaysia. Melalui penglibatan ekuiti Ford sebanyak 49% di dalam AMIM Holdings Sdn Bhd, kini AMIM Holdings berada dalam kedudukan yang sesuai untuk mendapat manfaat dari liberalisasi pasaran yang dijangka akan berlaku di rantau ini. Peningkatan penglibatan Ford dalam peluang domestik dan serantau juga dijangka akan memperbaiki nilai pemegang saham di dalam operasi ini tidak lama lagi.

Pada tahun ini, pengedar kereta BMW iaitu Auto Bavaria, telah berjaya memenangi Anugerah "Kereta Penumpang Eropah Paling Laris di Malaysia".

PROPERTY DEVELOPMENT

PROJECT MANAGEMENT

The property market made a modest recovery as a result of comprehensive measures taken by the Government to revive the economy. Aided by improved sentiment and low mortgage interest rates, the recovery process started with the cheaper residential units, and continued with the higher priced residential properties during the second half of the year. However, the other sub-sectors, including commercial and industrial development, remained relatively depressed.

During the year, 82 units of link houses, 573 units of medium-cost apartments and 500 units of low-cost apartments were launched in UEP Subang Jaya (Stage VI), marking the tail-end of its development. The remaining pockets of land have been earmarked for commercial and strata title residential development.

Putra Heights, a 727-hectare self-contained township located to the south of and contiguous to UEP Subang Jaya, was launched in November 1999. During the year, 1,109 units of double-story link houses were launched. The response has been excellent and all the units have been sold.

A 78-unit phase of single-storey link houses was launched in Taman Pasir Putih, Johore in May 2000. Demand was moderate.

The Company has awarded the contract for the construction of an RM11 million trumpet interchange along the Damansara-Puchong Expressway. The interchange, connecting the southern portion of UEP Subang Jaya (Stage VI) and the northern portion of Putra Heights, will enhance the overall traffic flow between the two areas.

Pasaran hartanah mencatatkan pemulihan sederhana berikutan langkah menyeluruh yang diambil oleh Kerajaan untuk memulihkan semula ekonomi. Dengan bantuan sentimen yang bertambah baik dan kadar faedah gadaai janji yang rendah, proses pemulihan ini bermula dengan unit kediaman kos rendah dan berterusan dengan hartanah kediaman berharga lebih tinggi pada setengah tahun kedua tahun ini. Walau bagaimanapun, sektor-sektor kecil yang lain, termasuk pembangunan perdagangan dan perindustrian kekal lembab.

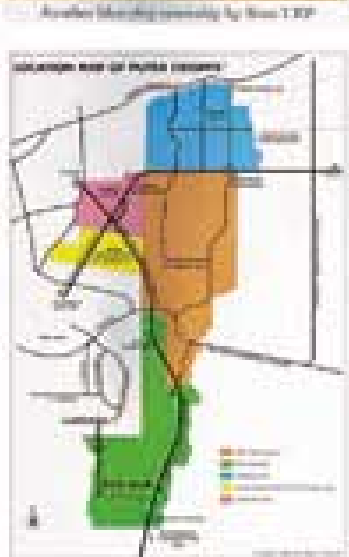

Pada tahun ini, 82 unit rumah berangkai, 573 unit pangsapuri kos sederhana dan 500 unit pangsapuri kos rendah telah dilancarkan di UEP Subang Jaya (Peringkat VI), peringkat penghujung pembangunannya di sini. Baki kelompok tanah yang ada telah diperuntukkan bagi pembangunan perdagangan dan kediaman hakmilik strata.

Putra Heights, sebuah perbandaran lengkap seluas 727 hektar yang terletak di bahagian selatan dan bersebelahan UEP Subang Jaya telah dilancarkan pada bulan November 1999. Pada tahun ini, 1,109 unit rumah berangkai dua tingkat telah dilancarkan. Sambutan yang diterima amat menggalakkan dan semua unit tersebut telah habis dijual.

Fasa 78 unit rumah berangkai satu tingkat telah dilancarkan di Taman Pasir Putih, Johor pada bulan Mei 2000. Permintaan yang diterima adalah sederhana.

Syarikat telah memberi kontrak untuk pembinaan persimpangan trumpet bernilai RM11 juta sepanjang Lebuhraya Damansara-Puchong. Persimpangan bertingkat yang menghubungkan bahagian selatan UEP Subang Jaya (Peringkat VI) dan bahagian utara Putra Heights ini akan mempertingkatkan laluan trafik keseluruhan antara kedua-dua kawasan tersebut.

PUTRA HEIGHTS

gambaran pelukis

The construction of the six schools under a RM50 million “design and build” contract awarded by the Government of Malaysia has been completed and handed over.

Ara Damansara, a 299-hectare commercial, institutional and residential development fronting the Sultan Abdul Aziz Shah International Airport Road, was launched in February 2000. During the year, 356 units of double-storey link houses were launched, of which 290 units have been sold to date. Sime UEP is the project manager of this development for Sime Pilmoor Development Sdn Bhd.

Shaw Brothers (M) Sdn Bhd, a 36% associated company of Sime UEP, reported a lower profit due to the softening of the commercial rental market. Plans to redevelop some of its cinema sites into offices and shop offices for lease or sale are currently on hold.

Sime Properties International, a joint venture between Sime UEP and Sime Singapore, was awarded the contract to manage Permodalan Nasional Berhad’s 226 service apartments in downtown Kuala Lumpur.

In April 2000, Sime UEP received the “Best Residential Development” Award of Distinction 2000 for UEP Subang Jaya from the Malaysian Chapter of the International Real Estate Federation (FIABCI). This is the third FIABCI Award won by the Company.

Sime UEP’s quest is to develop environmentally friendly townships in addition to its commitment to provide quality products and services to its customers. On 7th July 2000, the Company became the first developer in Malaysia to be awarded the MS ISO 14000 Environmental Management System.

Pembinaan enam buah sekolah di bawah kontrak “rekabentuk dan bina” bernilai RM50 juta yang diberi oleh Kerajaan Malaysia telah siap dan diserahkan.

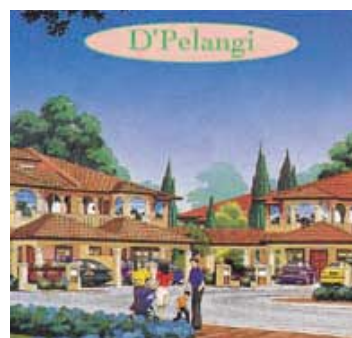

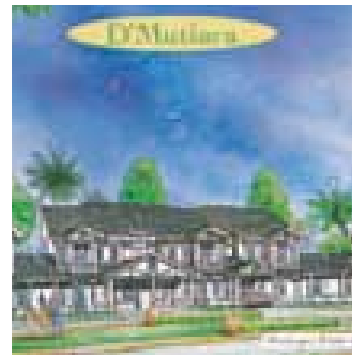

Ara Damansara, sebuah kawasan pembangunan perdagangan, institusi dan kediaman seluas 299 hektar berhadapan Jalan Lapangan Terbang Sultan Abdul Aziz Shah telah dilancarkan pada bulan Februari 2000. Pada tahun ini, 356 unit rumah berangkai dua tingkat telah dilancarkan dan 290 unit telah dijual sehingga kini. Sime UEP adalah pengurus projek pembangunan ini bagi pihak Sime Pilmoor Development Sdn Bhd.

Shaw Brothers (M) Sdn Bhd, syarikat bersekutu 36% milik Sime UEP, melaporkan pengurangan keuntungan berikutan kelembapan pasaran sewa perdagangan. Rancangan untuk membangunkan semula beberapa tapak panggung wayangnya menjadi pejabat dan kedai pejabat untuk pajakan atau jualan kini ditangguhkan.

Sime Properties International, sebuah syarikat usahasama antara Sime UEP dan Sime Singapore telah diberi kontrak untuk menguruskan 226 unit pangsapuri servis Permodalan Nasional Berhad di tengah-tengah Kuala Lumpur.

Pada bulan April 2000, Sime UEP menerima Anugerah Cemerlang 2000 “Pembangunan Kediaman Terbaik” bagi UEP Subang Jaya daripada Malaysian Chapter of the International Real Estate Federation (FIABCI). Ia merupakan Anugerah FIABCI ketiga dimenangi oleh Syarikat tersebut.

Sime UEP bertekad untuk memajukan perbandaran yang mesra alam dan komited untuk menyediakan produk dan perkhidmatan berkualiti kepada para pelanggannya. Pada 7hb Julai 2000, Syarikat ini menjadi pemaju pertama di Malaysia yang diberi anugerah Sistem Pengurusan Alam Sekitar MS ISO 14000 .

TRADING & SERVICES

TRAVEL & TOURISM

ENERGY & ENGINEERING

The Malaysia Region operating companies have overcome the effects of the Asian economic crisis during the year and returned the Region to pre-crisis profit levels. Most of the businesses showed a marked improvement over the previous year's performance.

Manufacturing

The manufacturing industry showed an improvement in turnover helped by strong exports and a stable currency. Sime Rengo Packaging's turnover was substantially higher compared to the previous year although profits were affected by the increasing cost of paper. Century Batteries recorded a significant improvement in turnover and profits. Sime Coatings also achieved a higher turnover and increased profits mainly attributable to a higher off-take of the automotive and decorative products. Sime Inax and Puchong Quarry recorded a small decrease in profits as a result of the continued sluggish state of the housing and construction sectors. Sime Kansai Paints and Sime Leigh recorded marginal losses in a competitive market which resulted in lower margins.

Trading and Services

Subang Jaya Medical Centre achieved higher profits while maintaining its position as a leader in the healthcare services industry. Sime Diamond Leasing performed well with improved profits in the revived economy which saw a better demand for financing. The duty-free retail operations increased turnover and profits, benefitting from an increase in tourist arrivals in the country. Mecomb Malaysia recorded an increase in profits with all its divisions performing up to expectations. Sime Logistics, Sime Darby Systems, Chubb Malaysia and China Engineers all saw an improvement in their respective profits. SIRIM-Sime Technologies maintained its turnover and profitability. The property management companies sustained their performance as the rental glut situation was alleviated by the recovery of business operations. Sime Kubota also recorded higher profits despite the effects of the appreciation of the Yen.

Syarikat-syarikat operasi Rantau Malaysia telah mengatasi kesan krisis ekonomi Asia pada tahun ini dan berjaya mengembalikan Rantau ini ke paras keuntungan sebelum krisis. Kebanyakan perniagaannya menampilkan prestasi yang bertambah baik berbanding prestasi tahun sebelumnya.

Perkilangan

Industri perkilangan menunjukkan peningkatan perolehan hasil keteguhan eksport dan kestabilan matawang. Perolehan Sime Rengo Packaging meningkat dengan ketara berbanding pencapaian tahun sebelumnya walaupun keuntungan terjejas akibat kenaikan kos kertas. Century Batteries merekodkan peningkatan perolehan dan keuntungan yang ketara. Sime Coatings juga mencapai peningkatan perolehan dan keuntungan hasil pelancaran lebih banyak produk automotif dan hiasan. Sime Inax dan Puchong Quarry merekodkan pengurangan keuntungan yang kecil berikutan kelembapan berterusan sektor perumahan dan pembinaan. Sime Kansai Paints dan Sime Leigh mencatatkan kerugian kecil dalam pasaran yang persaingan yang telah menyebabkan pengurangan margin.

Perdagangan dan Perkhidmatan

Subang Jaya Medical Centre mencapai peningkatan keuntungan dan mengekalkan kedudukannya sebagai peneraju dalam industri perkhidmatan penjagaan kesihatan. Sime Diamond Leasing mencatatkan prestasi memuaskan dengan keuntungan bertambah baik selaras dengan pemulihan ekonomi yang mendorong pertambahan permintaan untuk pembiayaan. Perolehan dan keuntungan operasi runcit bebas cukai meningkat berikutan pertambahan ketibaan pelancong ke dalam negara. Mecomb Malaysia mencatatkan peningkatan keuntungan dan semua bahagiannya menunjukkan prestasi yang mencapai jangkauan. Sime Logistics, Sime Darby Systems, Chubb Malaysia dan China Engineers mencatatkan peningkatan keuntungan. SIRIM-Sime Technologies mampu mengekalkan tahap perolehan dan keuntungannya. Syarikat-syarikat pengurusan hartanah mengekalkan prestasi masing-masing apabila pemulihan operasi perniagaan meredakan situasi lebih sewaan. Sime Kubota juga mencatatkan pertambahan keuntungan walaupun berhadapan dengan masalah kenaikan matawang Yen.

*Sime Darby Travel's Subang Jaya branch office at Malaysia Region Centre
Pejabat cawangan Sime Darby Travel, Subang Jaya di Pusat Rantau Malaysia*

Sime Distribution Services recorded lower profits due to the higher cost of distribution outside the Klang Valley area. Sime Insurance Broking recorded lower profits resulting from the effects of the economic crisis.

Sime Darby Marketing's turnover and profits dropped in a year which saw the cessation of several agencies.

SimeNet Technologies launched its B2C Web-based business during the year with the setting up of the ST Mart Virtual Staff Shop.

Travel and Tourism

With a recovery in the tourism industry, sales by Sime Darby Travel improved for the year resulting in higher profits. Sime Holidays also reported improved profits due to an increase in the number of outbound tours. Sime Darby Rent-A-Car recorded increased turnover and profits as a result of demand from the corporate sector.

Energy and Engineering

The Oil and Gas division turned around positively, riding on the rising oil price which brought about the revival of major projects. Fabrication for two major contracts commenced during the year at Sime SembCorp Engineering, resulting in the company recording higher profits. Sime Engineering also made an improvement in profits after securing the engineering and civil works for the MLNG 3 project.

In the power generation industry, the Group increased its stake in Port Dickson Power from 40% to 60%, making it a subsidiary. It was a good year with profits maintained. Janaurus's position also improved as a result of increased turnover.

Sime Distribution Services mencatatkan pengurangan keuntungan akibat kenaikan kos pengedaran di luar kawasan Lembah Klang. Kesan krisis ekonomi menyebabkan Sime Insurance Broking mencatatkan keuntungan yang berkurangan.

Pemberhentian beberapa agensi dalam tahun ini telah menyebabkan perolehan dan keuntungan Sime Darby Marketing turun.

SimeNet Technologies melancarkan perniagaan berasaskan Web B2C pada tahun ini melalui penubuhan ST Mart Virtual Staff Shop.

Kembara dan Pelancongan

Pemulihan industri pelancongan membolehkan perolehan Sime Darby Travel meningkat untuk menghasilkan keuntungan lebih tinggi pada tahun ini. Sime Holidays turut melaporkan peningkatan keuntungan hasil pertambahan bilangan persiaran ke luar negeri. Sime Darby Rent-A-Car merekodkan pertambahan perolehan dan keuntungan hasil permintaan daripada sektor korporat.

Tenaga dan Kejuruteraan

Bahagian Minyak dan Gas pulih dengan positif berikutan kenaikan harga minyak menyebabkan pemulihan berbagai projek besar. Fabrikasi bagi dua kontrak utama Sime SembCorp Engineering bermula pada tahun ini membolehkan syarikat tersebut mencatatkan peningkatan keuntungan. Sime Engineering juga mencatatkan peningkatan keuntungan selepas memperolehi beberapa kerja kejuruteraan dan awam untuk projek MLNG 3.

Dalam industri penjanaan kuasa, Kumpulan telah menambah kepentingannya di dalam Port Dickson Power daripada 40% kepada 60%, menjadikannya sebuah syarikat subsidiari. Ia mengekalkan keuntungan dalam satu tahun yang memuaskan. Kedudukan Janaurus turut bertambah baik dengan pertambahan perolehan.

MOTOR DEALERSHIP

HEAVY EQUIPMENT

TRAVEL & TOURISM

Motor Dealerships

The new vehicle market in Hong Kong grew by 17% in the financial year under review compared with that of the previous year, but the growth was characterised by sharp discounting across all segments. Margins stayed under strong pressure throughout the year. The Company's market share slipped to 16% as there were no new models introduced during the year.

The passenger vehicle sector, which accounts for more than 70% of the total new vehicle market in Hong Kong, reported registrations of 28,000 units which was a growth of 17%, reversing the decline of recent years. The Company captured 17% of the market with higher sales of BMW and Ford vehicles. The Mitsubishi franchise registered 1,877 sales showing the highly competitive nature of the Japanese market segment without any new models.

Mitsubishi performed much better in the commercial vehicle sector, reporting sales of 1,171 units which was 35% better than the last financial year. Considerable efforts were made with major customers to understand their specification requirements and to tailor financing programmes.

Sime Darby Motor Services, which provides specialist services for the aftersales care of vehicles, consolidated its position in the market and had a highly satisfactory year. Two new Pit Stop centres, the quick service repairer at menu prices, were opened at Yuen Long and To Kwa Wan during the year to complement the first unit in Aberdeen. The company also relocated its service centre in the eastern part of Kowloon Island from 370 Kwun Tong to 92 Sung Wong Toi Road, taking advantage of bigger premises at lower rentals.

Perwakilan Jualan Motor

Pasaran kenderaan baru di Hong Kong berkembang sebanyak 17% pada tahun kewangan yang ditinjau berbanding pada tahun sebelumnya, tetapi pertumbuhan ini adalah hasil dorongan pemberian diskaun secara meluas dalam semua segmen. Justeru itu, margin terus tertekan sepanjang tahun. Bahagian pasaran Syarikat susut kepada 16% kerana ketiadaan model baru yang diperkenalkan pada tahun ini.

Sektor kenderaan penumpang yang merupakan lebih 70% daripada jumlah pasaran kenderaan baru di Hong Kong, melaporkan peningkatan pendaftaran sebanyak 17% kepada 28,000 unit, kian pulih berbanding beberapa tahun kebelakangan ini. Syarikat menguasai 17% daripada pasaran tersebut dan mencatatkan pertambahan jualan kenderaan BMW dan Ford. Francais Mitsubishi mencatatkan jualan sebanyak 1,877 unit, menunjukkan bahawa ketiadaan kenderaan model baru menyebabkan keadaan segmen pasaran kereta Jepun amat bersaing.

Mitsubishi menampilkan prestasi yang bertambah baik dalam sektor kenderaan perdagangan, melaporkan jualan sebanyak 1,171 unit iaitu 35% lebih tinggi berbanding pencapaian pada tahun kewangan sebelumnya. Berbagai usaha telah dilakukan untuk memahami keperluan spesifikasi para pelanggan utama dan menyediakan program pembiayaan yang bersesuaian kenderaan.

Sime Darby Motor Services yang menyediakan perkhidmatan khusus bagi penjagaan kenderaan selepas jualan kenderaan, mengukuhkan kedudukannya di pasaran dan mencapai satu tahun yang amat memuaskan. Dua pusat Pit Stop baru, pembaikpulihan servis cepat pada harga tetap, telah dibuka di Yuen Long dan To Kwa Wan pada tahun ini untuk melengkapi unit pertama di Aberdeen. Syarikat juga telah memindahkan pusat servisnya di bahagian timur Pulau Kowloon dari 370 Kwun Tong ke 92 Sung Wong Toi Road, untuk mengambil peluang ketersediaan ruang premis yang lebih besar pada sewa yang rendah.

The best-selling Ford Focus
Ford Focus yang paling laris jualannya

Aftersales services will continue to be a major feature of the Company's businesses, particularly at a time when vehicles are likely to be maintained for a longer period. This business, whilst profitable, requires continuous staff training programmes, good customer service and attentive management, as consumers endlessly pursue good values.

During the year, the Company further consolidated its position in China through its joint-venture company, Sime Winner Holdings. By working closely with its Mainland Chinese partners, there are now retail outlets in the cities of Beijing, Kunming and Guangzhou. Sime Winner, as an importer, continued to collaborate with Nissan Motor Company as well as deepening its existing relationships with Mitsubishi Motors and BMW. With China on the verge of joining the World Trade Organisation some time in 2001, there are positive grounds for optimism for the China business.

Heavy Equipment

The Heavy Equipment operations, which essentially encompass that of Caterpillar dealerships in Hong Kong and Macau and the six southern provinces of China, registered sound growth in the financial year under review. Infrastructure spending kept up the demand for equipment, parts and services as both the Chinese and SAR governments tried to boost economic growth through major projects.

China Engineers was a major supplier of machines to the West Rail Project, which seeks to link Tsuen Wan to Yuen Long. During the year, it also started rental operations, a strategy to re-deploy relatively new machines for higher yields. Sanitary landfill projects have now become a regular business focus segment.

During the year, the Company began to consolidate its operations in China through the base in Shunde and reported good sales of the CAT hydraulic excavators manufactured by the Caterpillar's joint venture in Xuzhou in the Jiangsu Province. The newly-acquired distributorships in Fujian, Jiangxi and Hunan also registered sales of both machines and engines, including two large wheel-loaders delivered for the Meizhouwan coal-fired power station.

Servis selepas jualan akan terus menjadi ciri utama dalam perniagaan Syarikat, terutamanya ketika kenderaan perlu disenggara untuk tempoh yang lebih panjang. Perniagaan ini, walaupun menguntungkan, memerlukan program latihan kakitangan yang berterusan, perkhidmatan pelanggan yang baik dan pengurusan yang peka, kerana keutamaan pengguna terhadap nilai yang memuaskan adalah berterusan.

Pada tahun ini, Syarikat telah mengukuhkan lagi kedudukannya di China melalui syarikat usahasanya, Sime Winner Holdings. Melalui hubungan erat dengan rakan-rakan China di Tanah Besar, kini beberapa saluran runcit telah diwujudkan di beberapa kotaraya seperti Beijing, Kunming dan Guangzhou. Sebagai sebuah firma pengimport, Sime Winner terus menjalin hubungan kerjasama dengan Nissan Motor Company serta mengeratkan lagi hubungannya yang sedia ada dengan Mitsubishi Motors dan BMW. Iklim perniagaan di China adalah meyakinkan berikutan penyertaan China dalam Pertubuhan Perdagangan Sedunia pada tahun 2001 nanti.

Peralatan Berat

Operasi Peralatan Berat yang secara keseluruhan meliputi perwakilan jualan Caterpillar di Hong Kong dan Macau serta enam wilayah selatan China mencatatkan pertumbuhan yang menggalakkan pada tahun kewangan yang ditinjau. Perbelanjaan infrastruktur menjana permintaan untuk peralatan, alat ganti dan servis kerana kerajaan Cina dan SAR berusaha gigih untuk memulihkan pertumbuhan ekonomi melalui beberapa projek besar.

China Engineers adalah pembekal utama mesin kepada Projek Landasan Keretapi Barat yang menghubungkan Tsuen Wan ke Yuen Long. Pada tahun ini, ia turut memulakan operasi sewaan, satu strategi untuk mengatur penggunaan mesin yang agak baru bagi mencapai pulangan hasil yang lebih tinggi. Kini, projek penimbunan tanah sanitari sering menjadi segmen fokus perniagaan.

Syarikat memulakan usaha mengukuhkan operasinya di China melalui pangkalannya di Shunde pada tahun ini dan melaporkan jualan memuaskan bagi jengkaut hidraulik CAT yang dikilang oleh syarikat usahasama Caterpillar di Xuzhou di Wilayah Jiangsu. Pengedaran baru diambilalih, di Fujian, Jiangxi dan Hunan turut melaporkan jualan memuaskan bagi jentera dan enjin, termasuk dua wheel-loaders besar yang dihantar untuk stesen janakuasa bakaran arang batu Meizhouwan.

ENGINEERING

HEAVY EQUIPMENT

MOTOR DEALERSHIP

PACKAGING

CONSUMER SERVICES

PROPERTY

Singapore Region's profits were its highest ever, due to the strong recovery of the Singapore economy, improved regional economies and successful business and operational strategies adopted by the Group.

Engineering

The Engineering group achieved higher profits in both Singapore and Thailand, benefiting from the growth of the electronics sector. There was strong demand for industrial automation equipment and Mecomb's state-of-the-art Parkrite car park management system.

Despite challenging conditions in Indonesia, the group, through its wholly-owned subsidiary P.T. Mecomb Teknik, achieved increased profitability with orders from the oil and gas and mining sectors.

Motion Smith also achieved higher profits with demand for its nautical charts and navigation instruments. Technochem became the first waste management company to achieve ISO 14000 certification for environmental management in July 1999.

Heavy Equipment

Despite a weak construction market, the Heavy Equipment group, represented by Tractors Singapore, recorded an improved performance. The company continued to lead as a supplier of heavy equipment to land reclamation works, notably the Jurong Island, Changi East, North East Coast and Sentosa Island projects. The power system division performed well with engine sales particularly for fast ferry and supply boats. Demand for parts and service remained good.

Packaging

The Packaging group also improved profitability. The Indonesian operation showed strong growth as it continued to provide reliable and uninterrupted service in demanding conditions. In Singapore, the results were marginally better than last year due to soft market demand for corrugated boxes and rising paper prices. The integration of recently-acquired PB Packaging System with Sime Rengo is progressing well.

Motor Dealership

It was an excellent year for the Motor Dealership group with significantly increased profits from higher unit sales. In Singapore, the availability of more affordable certificates of entitlement combined with improved marketing and strong aftersales service resulted in substantially higher unit sales.

Keuntungan paling tinggi yang pernah dicatat oleh Rantau Singapura adalah berikutan keteguhan pemulihan ekonomi Singapura, pertumbuhan ekonomi serantau dan kejayaan strategi perniagaan dan operasi yang diamal oleh Kumpulan.

Kejuruteraan

Pertumbuhan sektor elektronik telah memanfaatkan kumpulan Kejuruteraan di Singapura dan Thailand yang mencapai peningkatan keuntungan. Peralatan automasi perindustrian dan sistem pengurusan tempat letak kereta Parkrite Mecomb yang canggih menikmati keteguhan permintaan.

Walaupun keadaan di Indonesia mencabar, kumpulan melalui syarikat subsidiari milik penuhnya, P.T. Mecomb Teknik mencapai pertambahan keuntungan hasil pesanan yang diterima daripada sektor minyak dan gas serta perlombongan.

Motion Smith juga mencapai keuntungan yang lebih tinggi daripada permintaan untuk carta nautikal dan instrumen navigasi. Technochem menjadi syarikat pengurusan sisa pertama mencapai pengesahan sijil ISO 14000 bagi pengurusan alam sekitar pada bulan Julai 1999.

Peralatan Berat

Walaupun pasaran pembinaan lemah, kumpulan Peralatan Berat yang diwakili oleh Tractors Singapore, mencatatkan prestasi yang bertambah baik. Syarikat ini terus mendahului sebagai pembekal peralatan berat kepada kerja-kerja tebus guna tanah, terutamanya projek Pulau Jurong, Timur Changi, Utara Pantai Timur dan Pulau Sentosa. Bahagian sistem kuasa mencatatkan prestasi memuaskan dengan jualan enjin, terutamanya bagi feri laju dan perahu bekalan. Permintaan bagi alat ganti dan servis kekal memuaskan.

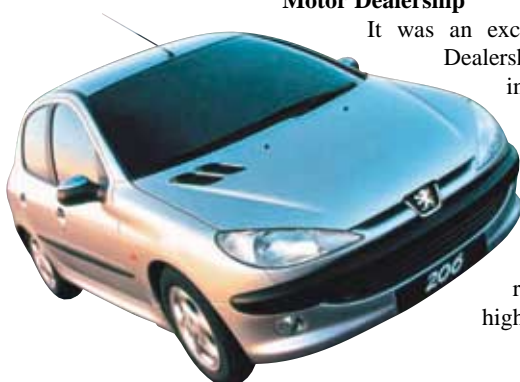

Pembungkusan

Kumpulan Pembungkusan juga mencapai keuntungan yang bertambah baik. Operasi Indonesia menampilkan pertumbuhan teguh kerana ia terus menyediakan perkhidmatan yang berwibawa dan lancar dalam keadaan yang mencabar. Di Singapura, keputusan yang dicapai bertambah baik sedikit berbanding pada tahun lepas akibat kelembapan pasaran bagi kotak bergelugur dan kenaikan harga kertas. Penyatuan PB Packaging System yang baru diambilalih dengan Sime Rengo berjalan dengan lancar.

Perwakilan Jualan Motor

Kumpulan Perwakilan Jualan Motor mencapai satu tahun cemerlang dengan peningkatan keuntungan yang ketara daripada pertambahan unit jualan. Di Singapura, ketersediaan sijil kelayakan yang lebih mampu diperolehi dan pemasaran yang bertambah baik serta keteguhan perkhidmatan selepas jualan membolehkan unit jualan meningkat.

Peugeot 206, distributed by AutoFrance, a division of Regent Motors Peugeot 206, diedar oleh AutoFrance, satu bahagian dalam Regent Motors

Performance Motors strengthened its position in the luxury car market. Regent Motors, which enjoyed increased sales due to the introduction of the Ford Focus and the Land Rover Freelander, also acquired the Peugeot franchise toward the end of the year, which will be marketed through its AutoFrance division.

New and used car sales in the New Zealand operation continued to grow. With more retail and after-sales facilities, Continental Car Services in Auckland is well positioned to extend its leadership position for the various well-known marques it represents.

Consumer Services

The Consumer Services group reported higher profits with good performance in all its operations. Both Dunlop tyres and Dunlopillo bedding products did well. The tyre product range was strengthened with the introduction of Dunlop's Formula 901, the acquisition of the "Sime" tyre agency, and the expansion of the "Simex" range.

Sime Darby Marketing enjoyed increased demand for its healthcare, and wines and spirits products. Sime Darby Services, the Hertz licensee for Singapore, reported significant growth in its long lease business and became the first car rental company to be awarded ISO 9002 accreditation during the year.

Profits from Sime Travel also improved as the economic recovery brought more business and tourism related activities. Sime Insurance Brokers reported marginally lower profits amidst soft market conditions and strong competition. Associates, Sime Diamond Leasing and Changi International Logistics Centre achieved good profits and turned in satisfactory results respectively.

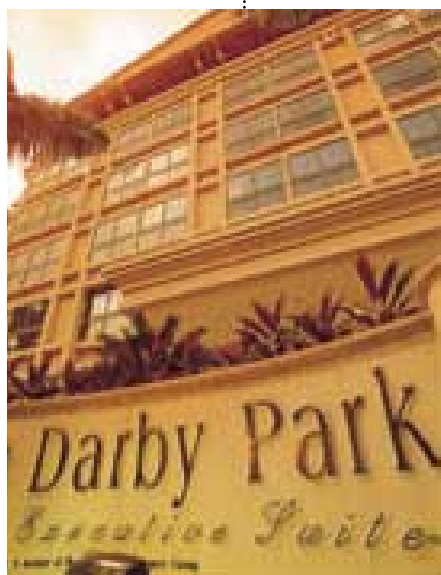

Property

The Property group reported decreased profits as there were no development projects for sale during the year. Three residential projects in Gilstead Road, Moulmein Rise and Balmoral Park are at various stages of planning and construction.

The hospitality division achieved higher occupancies in Singapore but at reduced rates. All other commercial and industrial properties in Singapore were substantially let throughout the year.

In Malaysia, Sime Singapore was appointed joint manager with Sime UEP for the PNB Darby Park Executive Suites in Kuala Lumpur.

In Indonesia, the group-managed Kawasan Komersial Cilandak reported good occupancy levels and profits.

*Darby Park, offering 75 well-appointed suites for short and medium stays
Darby Park menawarkan 75 suite serba lengkap untuk penginapan jangka pendek dan sederhana*

Performance Motor mengukuhkan kedudukannya di pasaran kereta mewah. Regent Motors yang menikmati peningkatan jualan hasil pengenalan Ford Focus dan Land Rover Freelander, turut mengambilalih francais Peugeot menjelang akhir tahun ini dan ia akan dipasarkan melalui bahagian AutoFrance.

Jualan kereta baru dan terpakai di operasi New Zealand terus meningkat. Kemudahan runcit dan khidmat selepas jualan Continental Car Services di Auckland yang semakin berkembang meletakkan ia dalam kedudukan yang baik untuk meluaskan kedudukannya sebagai peneraju untuk berbagai marque terkenal yang diwakilinya.

Perkhidmatan Pengguna

Kumpulan Perkhidmatan Pengguna melaporkan peningkatan keuntungan dengan prestasi memuaskan dalam semua operasi. Prestasi tayar Dunlop dan barangan tempat tidur Dunlopillo adalah memuaskan. Barangan tayar bertambah kukuh dengan pengenalan Formula 901 Dunlop, pengambilalihan agensi tayar "Sime" dan pengembangan tayar jenis "Simex".

Sime Darby Marketing menikmati pertambahan permintaan bagi barangan penjagaan kesihatan, wain dan minuman keras. Sime Darby Services, pemegang lesen Hertz bagi Singapura, melaporkan pertumbuhan ketara dalam perniagaan penyewaan jangka panjangnya dan menjadi syarikat sewa kereta pertama diberi akreditasi ISO 9002 pada tahun ini.

Keuntungan daripada Sime Travel juga bertambah baik selaras dengan pemulihan ekonomi yang menjana lebih banyak perniagaan dan aktiviti berkaitan pelancongan. Sime Insurance Brokers melaporkan pengurangan keuntungan yang kecil dalam keadaan pasaran yang lembab dan persaingan yang semakin meningkat. Syarikat-syarikat bersekutu, Sime Diamond Leasing mencapai keuntungan yang baik, manakala Changi International Logistics Centre juga mencapai keuntungan yang memuaskan.

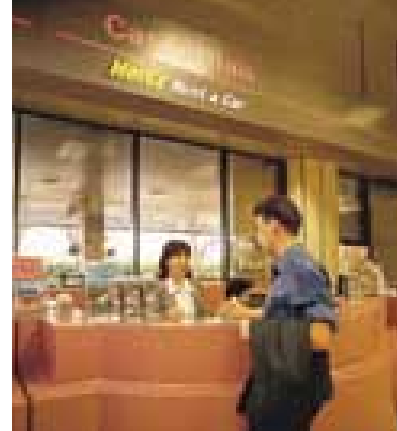

Hartanah

Kumpulan Hartanah melaporkan pengurangan keuntungan kerana tiada projek pembangunan untuk dijual pada tahun ini. Tiga projek kediaman di Gilstead Road, Moulmein Rise dan Balmoral Park berada dalam berbagai peringkat perancangan dan pembinaan.

Bahagian hospitaliti mencapai penghunian yang tinggi di Singapura, tetapi pada kadar yang berkurangan. Semua hartanah perdagangan dan perindustrian lain di Singapura telah sebahagian besarnya disewakan sepanjang tahun ini.

Di Malaysia, Sime Singapore telah dilantik sebagai pengurus bersama dengan Sime UEP untuk mengendalikan Suite Eksekutif PNB Darby Park di Kuala Lumpur.

Di Indonesia, Kawasan Komersial Cilandak yang diurus oleh kumpulan melaporkan tahap penghunian dan keuntungan yang memuaskan.

Hastings Deering

The year provided many new challenges to the Hastings Deering management team. New machine sales were down on the previous year as customers resisted currency-induced price increases. The Parts and Service business however continued to grow steadily and provided a strategically important profit stream, capitalising on a key core competence.

Hastings Deering (Australia) Ltd turned in a reasonably solid performance under the circumstances. New machine sales were down but Used Equipment showed pleasing growth. The weaker Australian dollar over the course of the year was reflected in price increases which slowed demand for new machines. The Company secured several new long-term maintenance contracts in the Mining Industry, which are strategically important for it to continue to grow the market share of the after-sales (parts and service) business opportunity. These contracts secure future parts and service business and allow the company to develop and refine its product support infrastructure to provide customers with even better value. With the broader product range available from suppliers, Hastings Deering trades across many important market segments. The Australian economy appears to be heading into a period of slower growth but the export industries are planning for some growth, aided somewhat by the weaker local currency.

Hastings Deering completed another successful year in Papua New Guinea, serving mainly the Mining and Forestry market sectors. Cost structures and service values were reviewed as customers sought ways to reduce their unit production costs. The management team in Papua New Guinea has done an excellent job in containing costs and maintaining market share in a difficult business climate.

Hastings Deering

Tahun ini membawa banyak cabaran baru kepada pasukan pengurusan Hastings Deering. Jualan mesin baru susut berbanding pada tahun sebelumnya kerana para pelanggan menolak kenaikan harga dorongan matawang. Walau bagaimanapun, jualan Alat Ganti dan Perkhidmatan terus berkembang dengan mantap dan menyediakan aliran keuntungan strategik dengan memanfaatkan kecekapan utama yang penting.

Hastings Deering (Australia) Ltd mencatatkan prestasi yang agak kukuh di bawah keadaan sedemikian. Jualan mesin baru susut tetapi Peralatan Terpakai menampilkan pertumbuhan yang mantap. Kelemahan dolar Australia sepanjang tahun terbukti melalui kenaikan harga yang telah melembapkan permintaan untuk mesin baru. Syarikat memperolehi beberapa kontrak penyenggaraan jangka panjang dalam Industri Perlombongan yang penting dari segi strategi untuk membolehkannya terus mengembangkan peluang bahagian perniagaan selepas jualan (alat ganti dan servis). Kontrak-kontrak ini memastikan pencapaian perniagaan alat ganti dan servis pada masa depan dan membolehkan syarikat ini membangun serta memperbaiki infrastruktur sokongan produknya untuk menawarkan nilai yang lebih baik kepada para pelanggan. Dengan jenis produk lebih luas yang tersedia daripada para pembekal, Hastings Deering mampu menembusi ke dalam banyak segmen pasaran penting. Ekonomi Australia sedang menuju satu tempoh pertumbuhan lembab, tetapi industri eksport sedang merancang untuk menjana pertumbuhan yang dibantu oleh matawang tempatan yang semakin lemah.

Hastings Deering mencatatkan satu lagi tahun cemerlang di Papua New Guinea, melalui penyediaan perkhidmatan terutamanya kepada sektor pasaran Perlombongan dan Perhutanan. Struktur kos dan nilai perkhidmatan telah dikaji semula kerana pelanggan mencari kaedah untuk mengurangkan kos pengeluaran unit mereka. Pasukan pengurusan di Papua New Guinea telah menjalankan tugas dengan cemerlang untuk membendung kos dan mengekalkan bahagian pasaran di dalam keadaan perniagaan yang sukar.

Ruang menyambut tetamu Jabatan Alat Ganti Brisbane yang diubahsuai baru-baru ini - sebahagian daripada program untuk mempertingkatkan perkhidmatan selepas jualan

Austchrome Pty Ltd achieved sound growth in sales and profit in an extremely cost-conscious market. The reclamation of components provides customers with a very cost effective alternative compared to replacing with brand new equipment. The team at Austchrome remains confident in their ability to further develop the market and also to increase market share.

Hastings Deering (Solomon Islands) Ltd had an extremely difficult year with the country facing major political instability culminating in the overthrow of the Government in June. A small team of dedicated staff has managed to keep operations open throughout on a much reduced scale. The future in the Solomons remains clouded with uncertainty, but logging activity in the outer islands is expected to continue.

Given the many challenges faced during the year, the Hastings Deering Group performed with credit and remains well-positioned to pursue suitable growth strategies. Management continues to focus on customer success and satisfaction, with its experienced team seeking innovative ways to improve customer value and enhance the customer's competitive advantage. Technology is playing an increasing role in the industries the company serves as a means to achieving a lower unit cost outcome for the producers.

Sime Darby Australia

During the year, South Perth Four Wheel Drive (SP4WD) experienced difficult trading conditions with the downturn in the gold mining sector. Activity and business confidence improved over the past six months and is expected to continue to improve into the next financial year. The company services the mining, exploration and tourism industries with a fleet of modern motor vehicles ranging from sedans and small four wheel drives to the top-of-the-range Toyota Landcruiser wagons and specialised vehicles.

The Karri Valley Resort at Pemberton, Western Australia was acquired in March 2000. Together with the Freycinet Inn at Margaret River, this sector of the company's business is expected to make a positive contribution to the group's results over the next 12 months. Both properties are positioned in popular tourist regions within four hours of Perth.

The retail and inbound travel business has shown an increase in revenue as the economies of traditional markets in South East Asia showed signs of improvement. The new marketing efforts in the UK and Europe are beginning to show positive signs for the future.

Austchrome Pty Ltd mencapai pertumbuhan yang menggalakkan dalam jualan dan keuntungan di dalam pasaran yang berhati-hati dari segi kos. Tebusguna komponen memberikan pilihan yang berkesan dari segi kos kepada pelanggan berbanding menggantikan dengan peralatan baru. Pasukan di Austchrome terus yakin terhadap kemampuan mereka memajukan pasaran dan mempertingkatkan bahagian pasaran.

Hastings Deering (Solomon Islands) Ltd melalui tahun yang sukar apabila negara tersebut menghadapi ketidakstabilan politik dengan rampasan kuasa Kerajaan pada bulan Jun. Namun sepasukan kecil kakitangan yang berdedikasi mampu meneruskan operasi pada skel yang jauh lebih kecil. Masa depan di Solomons kekal tidak menentu, tetapi aktiviti pembalakan di pulau-pulau luaran dijangka akan berterusan.

Memandangkan berbagai cabaran yang dihadapi pada tahun ini, Kumpulan Hastings Deering menunjukkan prestasi yang membanggakan dan berada pada kedudukan yang baik untuk mencapai strategi pertumbuhan yang sesuai. Pengurusan terus memfokus kepada kejayaan dan kepuasan para pelanggan, dengan pasukannya yang berpengalaman sentiasa mengilhamkan kaedah inovatif untuk memperbaiki nilai pelanggan dan mempertingkatkan daya saingan pelanggan. Teknologi memainkan peranan yang semakin penting dalam industri yang disertai oleh syarikat sebagai kaedah untuk membantu pengeluar mencapai kos unit yang lebih rendah.

Sime Darby Australia

Pada tahun ini, South Perth Four Wheel Drive (SP4WD) mengalami keadaan perdagangan yang sukar berikutan kelembapan sektor perlombongan emas. Aktiviti dan keyakinan perniagaan bertambah baik sepanjang tempoh enam bulan lepas dan dijangka akan terus meningkat hingga ke tahun kewangan akan datang. Syarikat menyediakan perkhidmatan kepada industri perlombongan, cari gali dan pelancongan dengan barisan kenderaan bermotor yang moden daripada jenis sedan dan pacuan empat roda kecil hinggalah kepada wagon Toyota Landcruiser dan kenderaan-kenderaan khas.

Pusat Peranginan "Karri Valley" di Pemberton, Australia Barat telah dibeli pada bulan Mac 2000. Bersama-sama Freycinet Inn di Margaret River, bahagian perniagaan syarikat dalam sektor ini dijangka memberi sumbangan positif kepada keputusan kumpulan dalam tempoh 12 bulan akan datang. Kedua-dua hartanah ini terletak di kawasan pelancongan yang popular sejauh empat jam perjalanan dari Perth.

Perniagaan runcit dan kembara dalam negeri menunjukkan peningkatan hasil berikutan ekonomi pasaran tradisional di negara-negara Asia Tenggara menunjukkan tanda-tanda pemulihan. Usaha pemasaran yang baru di UK dan Eropah mula menunjukkan tanda-tanda positif untuk masa depan yang lebih cemerlang.

TRACTORS

TRADING

PROPERTY DEVELOPMENT

MANUFACTURING

Philippines Region's operations continued to be affected by the weak economic conditions currently prevailing in the country. Despite sales volume and price increases, agricultural and trading activities generated losses due to higher importation costs, while residential housing activities remained in the doldrums.

The expanded nation-wide dealer network for tractors and implements resulted in increased market share. The company is well positioned to benefit from an upturn in the market. However, Government support promised to the Agricultural sector has not materialised and growth within the industry continued to be hampered by the lack of affordable financing.

Major infrastructure projects were greatly affected by the general decline in the construction and civil engineering sectors. Contracts are being completed, although many new projects have been postponed. Sales of waterproofing materials, sealants and paints increased.

Construction on the Chilterns Residential Estate was put on hold due to the expected continuation of the weak housing market, with additional investment suspended pending sustained market improvement.

Lec Refrigeration Plc incurred a loss for the year. The transfer of production facilities to a single factory has been completed and will substantially reduce overheads. A new product range has been developed and Lec is expected to be profitable in future years.

SDPI has taken measures to improve efficiency and its cost structure to enable revenue from operations to improve in tandem with the economy.

Operasi Rantau Filipina terus terjejas akibat kelemahan ekonomi yang kini melanda negara tersebut. Walaupun volum jualan dan harga meningkat, aktiviti pertanian dan perdagangan menanggung kerugian akibat kos import yang lebih tinggi, sementara aktiviti perumahan kediaman kekal suram.

Rangkaian wakil penjual traktor dan peralatan seluruh negara yang diperluaskan telah mendorong peningkatan bahagian pasarannya. Syarikat ini berada dalam kedudukan yang memuaskan untuk memanfaatkan pemulihan pasaran. Walau bagaimanapun, sokongan yang dijanjikan oleh Kerajaan kepada sektor Pertanian tidak dapat ditunaikan dan pertumbuhan dalam industri ini terus terjejas kerana kekurangan pembiayaan yang berpatutan.

Projek infrastruktur utama terjejas akibat kemerosotan menyeluruh dalam sektor pembinaan dan kejuruteraan awam. Walaupun banyak projek baru ditangguh, namun kontrak tetap disiapkan. Jualan bahan kalis air, penyendat dan cat mencatatkan peningkatan.

Kelemahan pasaran perumahan yang dijangka berterusan menyebabkan pembinaan Chilterns Residential Estate ditangguhkan. Selain itu, pelaburan tambahan telah digantung sementara menunggu pemulihan mampun di pasaran.

Pada tahun ini, Lec Refrigeration Plc menanggung kerugian. Pemindahan kemudahan pengeluaran ke sebuah kilang sahaja telah diselesaikan dan langkah ini akan mengurangkan overhead dengan ketara. Satu barisan produk baru telah dimajukan dan Lec dijangka akan mencatat keuntungan pada tahun-tahun akan datang.

SDPI pula telah mengambil berbagai langkah untuk mempertingkatkan kecekapan dan struktur kosnya bagi membolehkan hasil daripada operasi meningkat selaras dengan pertumbuhan ekonomi.
