

## **Malaysian ACE-Listed Kronologi Unit, Kronicles Singapore, Partners Trusted Source, a Subsidiary of Temasek Management Services to Provide Data Back-Up**

**Kuala Lumpur/Singapore, 20 November 2017 – Kronologi Asia Berhad** (“Kronologi”) announced today that its subsidiary Kronicles (Singapore) Pte Ltd (“Kronicles”) has signed an agreement to provide data backup services in collaboration with **Trusted Source Pte Ltd** (“Trusted Source”), a subsidiary of Temasek Management Services (“TMS”), which is a member of Temasek Holdings, a global investment company headquartered in Singapore.

Trusted Source offers end-to-end Business and Technology Services, including digitalised Board, HR and Finance solutions, to its customers. It’s IT services and solutions include IT infrastructure and security, application development and business intelligence, enterprise management services, project management and electronic polling.

Trusted Source will partner Kronicles Singapore to provide a private data backup service for subsidiaries of the former, which intends to launch a Regional Disaster Recovery centre to support the regional data needs of its network of subsidiary companies. This centre will use Singapore as a physical point of presence. Through this partnership, both parties hope to cater to the growing demand for data storage and protection solutions.

Kronicles Singapore will invest in new equipment and services to be installed at Trusted Source’s new disaster recovery centre located in Singapore. With this partnership, Trusted Source will be able to extend data backup, data storage and protection services to its customers within the Temasek group as well as external clients.

Through its Kronicles brand, Kronologi helps regional small and medium enterprises back up and protect their data. It uses a hybrid architecture (cloud and on-site appliances) to help businesses mitigate risks to their digital assets arising from disasters, ransomware and other events.

Demand for data backup is being driven by the proliferation of data such as emails, staff and business records, legal documents and more, which companies must safeguard as part of efforts to ensure business continuity. As recent events have demonstrated, precautions against ransomware are also critical for business continuity.

“The addition of Trusted Source as our partner is a strong endorsement of Kronologi’s capability and reliability. We are excited with this partnership with Trusted Source for the value added data backup service which employs a private cloud architecture. The service has already attracted new subscribers and we are confident it will enable us to deliver value to Trusted Source’s customers within the group and beyond,” said Mr. Philip Teo, Kronologi’s Acting Chief Executive Officer.

“The collaboration with Kronicles (Singapore) Pte Ltd clearly signifies our commitment in strengthening our data backup and data protection to our internal and external customers with the intent to expand the service to many locations in Asia. It is the ideal solution for us to meet our growing needs for enhanced data storage and protection services,” said Mr Desmond Aw, Senior Vice President of Trusted Source Pte Ltd.

The Kronicles service is powered by Quantum Corporation (NYSE: QTM), a leading expert in scale-out tiered storage, archive and data protection. Incorporating flash, disk, object storage and tape, Quantum provides solutions for capturing, sharing and preserving digital assets over the entire data lifecycle, both on-premises and in the cloud.

### **About Trusted Source Pte Ltd**

Trusted Source is a fully owned subsidiary of Temasek Management Services (TMS), which is a member of Temasek Holdings. It offers end-to-end digital business services to help companies perform to their utmost potential in an increasingly disrupted economy. Over the last 30 years, Trusted Source, as part of TMS and the Temasek ecosystem of companies, collectively gained solid business experience developing integrated shared services to support the growth of its clients’ businesses. The company expanded its offering of business services delivering first-rate Corporate Secretarial, HR, Finance, and Technology services via its family of companies: Trusted Board, Trusted Services and Trusted Source. Today, the firm’s evolution has led it to combine these subsidiaries into a newly rebranded Trusted Source with the aim of providing Business and Technology Services, including digitalised Board, HR and Finance solutions, to its customers. Trusted Source has a team of approximately 400 people in Singapore with a client network spanning multiple key industries. To find out more please visit : <http://www.trustedsource.com.sg>
